

Human Risk Intelligence for MSPs

Sell it. Scale it. Prove it.

✓ User Risk Visibility

✓ Scalable Delivery

✓ Compliance Readiness

✓ Measurable Improvement

Human Risk **Intelligence** connects real-world risk signals, giving MSPs a clearer view of where exposure is building, what needs attention and how risk is changing over time.

FROM VISIBILITY TO VALUE

Turn clearer risk insight into a service clients value

Sell a stronger human risk service

Move beyond completion reports and position Human Risk Intelligence as a higher-value client conversation.

Run outcome-led QBRs

Show who needs attention, what is being addressed and how risk is changing over time.

Strengthen your wider security stack

Connect human risk insights to Microsoft 365, email security, compliance and identity services.

FROM INSIGHT TO ACTION

See what matters most

See whether behavior is changing

Show whether training, policy, phishing and security activity are reducing risk in practice.

Spot Toxic Combinations

Reveal where weak behavior, high access, and exposure stack on one person.

Guide the next action

Point to the next actions that reduce exposure, delivered through the wider usecure platform.

Show improvement over time

Track changes in risk, compliance activity, and program progress across clients.

THE SIGNALS

Signals you already have, finally connected

Awareness training

Knowledge gaps, completion activity, learning progress, and risk-based education.

Phishing simulations

Click behavior, reporting behavior, repeat risk, and threat response.

Policy management

Policy acknowledgment, policy gaps, reminders, and accountability evidence.

Breach exposure

Exposed credentials, breached accounts, and account-level risk.

Identity and access signals

Target value, access risk, hygiene indicators, and identity-level exposure.

See uHealth in action

Book a usecure demo to see how uHealth surfaces real-life risk signals, ranks what matters, and proves risk is going down.
